

PIENAAR ENERGY (PTY) LTD

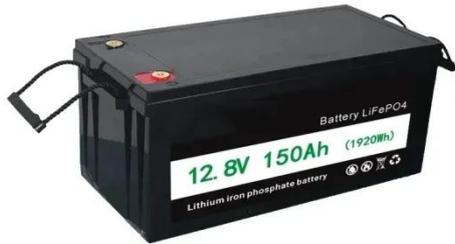

Dominica Solar Power Generation and solar container energy storage system

Overview

Discover how Dominica is leveraging wind, solar, and battery storage systems to achieve energy independence while addressing climate resilience. The new BESS project is designed to significantly reduce reliance on diesel generation, enhances electricity quality, and strengthens infrastructure resilience in key regions of the island. It. Green energy now anchors Dominica's push for progress, reflecting a decisive change in how the nation approaches growth and self-reliance. Historically dependent on costly imported diesel, over 90% of its electricity in the early 2010s, Dominica has embraced renewable energy sources like. Dominica has high solar potential with a solar resource of 5.6 kWh per square meter per day and also has approximately 30 MW of wind power potential, some of which is under development. Perfect for emergency situations. The commissioning of a 6 MW / 6 MWh.
