

**PIENAAR ENERGY (PTY) LTD**

# **Double-rib photovoltaic panel installation**

## Overview

---

This comprehensive guide covers proper mounting height (0.5 meters for ground-mount), optimal array spacing to maximize rear-side irradiance, electrical configuration for increased current capacity, and site preparation for high-albedo surfaces. 800-669-0009 • www.com

The purpose of this Recovery Advisory is to provide guidance on existing code requirements as well as recommend best practices for attachment design, installation, and maintenance of rooftop solar panels, also known as photovoltaic (PV) panels, to increase panel wind resistance in the U. Virgin. This general manual provides important safety informati-on relating to the installation, maintenance and handling of bifacial double glass solar modules (BiKu and BiHiKu series). Should you have any questions, please contact CNTSUN at 027-8695-1865. Unless otherwise agreed, the document serves. Installing solar panels requires careful planning and precise execution to maximize energy production and system longevity. Consider the layout for optimal.
