

PIENAAR ENERGY (PTY) LTD

Earthquake-resistant energy storage cabinets for hotels using Freetown Telecom

Overview

Reliable cabinet fixation protects critical infrastructure and prevents costly downtime. Vibration damping brackets provide superior protection for telecom cabinets in high-seismic zones, ensuring equipment stability during earthquakes. The enclosures are loaded with simulated equipment and placed on a shaker table designed to replicate the force of an earthquake. Solid sided construction, 2 pair of fully adjustable mounting rails, Seismic bolt down base with cable access holes, top panel with cable. Belden's Server and Switch Cabinets are certified to Seismic Zone 4 requirements, passing vibration and shock testing per GR-63-CORE Network Equipment Building System (NEBS) requirements with no structural damage in a certified lab.

Earthquake-resistant energy storage cabinets for hotels using Free

Seismic Cabinets

For Optical Distribution Frame installations, DCX Seismic Cabinets are fully configurable, front-access cabinets that serve as a high-density fiber interconnect or the main building block for a large fiber cross connect.
