

PIENAAR ENERGY (PTY) LTD

Eei energy storage products

Overview

EEl supplies Energy Storage solutions for residential systems, for an intelligent and flexible grid and a better and more efficient use of energy sources. The energy produced during the day, when consumption in a home is low, is stored in the batteries to then be supplied when needed. L'inverter. Electric companies are increasingly using innovative technologies such as energy storage, hydrogen, and microgrids to develop a smarter energy grid that delivers energy safely and reliably to customers. The system also includes the back-up function that guarantees. The possibility to store the energy in order to reduce peak of absorption or to use renewable energy sources more efficiently is one of the most important part of the Smart Grid implementation EEl design and manufactures a full range of Energy Storage System, specifically designed for Industrial. The EDO system includes all the components needed to transform the energy produced by photovoltaic panels into usable energy for household consumption or to store it in the integrated battery and use it in the moment of real need. The EDO Residential Hybrid Storage Unit EEl emerges as a breakthrough solution, blending solar optimization.

Eei energy storage products

Lithium battery parameters

Product capacity: 100Ah

Product size: 135*197*35mm

Product weight: 1.82kg

Product voltage: 3.2V

internal resistance: within 0.5

EEl EDO Hybrid Energy Storage System

The EDO system includes all the components needed to transform the energy produced by photovoltaic panels into usable energy for household consumption or to store it in the integrated battery and use it in the ...

EEl ENERGY STORAGE SYSTEMS

Energy Storage System manufactured by EEl can contribute effectively to the implementation of Smart Grid, giving to the customer a solution that can bring to an improvement of energy quality and availability, together ...

[Get Price](#)

Energy Storage

Energy storage, including hydrogen as a storage medium, can be integrated into microgrids. This not only gives customers greater control over their energy needs, but also helps electric companies enhance the resilience ...
