

PIENAAR ENERGY (PTY) LTD

Energy storage battery growth rate

Overview

Global battery storage installations saw a remarkable 43% increase last year, and this blistering pace is set to continue. 8% average annual growth rate through 2034, underscoring a long-term, sustained expansion. In the United States, cumulative utility-scale battery storage capacity exceeded 26 gigawatts (GW) in 2024, according to our January 2025 Preliminary Monthly Electric Generator Inventory. With renewable sources expected to account for the largest share of electricity generation worldwide in the coming decades, energy storage will play a significant role in maintaining the balance between. Battery storage in the power sector was the fastest growing energy technology in 2023 that was commercially available, with deployment more than doubling year-on-year. Strong growth occurred for utility-scale battery projects, behind-the-meter batteries, mini-grids and solar home systems for. After a historic 2025, when global BESS capacity surpassed 250 GW and overtook pumped hydropower, momentum is set to accelerate in 2026. 90 billion in 2026 to approximately USD 102.
