

PIENAAR ENERGY (PTY) LTD

Energy storage battery installations in 2025

Overview

Benchmark Mineral Intelligence estimates that global battery energy storage system (BESS) installations reached around 315 GWh in 2025, up nearly 50% year-on-year compared with 2024. This reflects strong growth across both grid-scale and behind-the-meter segments, with large utility projects. We expect 63 gigawatts (GW) of new utility-scale electric-generating capacity to be added to the U. This amount represents an almost 30% increase from 2024 when 48.5GW of storage was installed in Q3 2025 in the US, pushing 2025 year-to-date installations past 2024 capacity. 8 MW facility in Staten Island. Courtesy of NineDot Energy This audio is auto-generated. 2025 is set to be another record-breaking year for energy storage after the U.
