

PIENAAR ENERGY (PTY) LTD

Energy storage box constant temperature

Overview

It is a long-lasting, constant-temperature cold-chain case with customizable temperatures. We can achieve temperatures from -80°C to 80°C and an independent runtime of up to 500 hours. No electricity or battery needed. All materials used in the product are non-toxic. In order to achieve the technical purpose, the invention adopts the following technical scheme: The constant temperature box with the energy storage function comprises a power assembly, an energy storage assembly, an evaporator assembly and a heat preservation cavity, wherein the power assembly is. We provide advanced climate controlled systems designed for diverse needs, offering reliable performance from -22 and $+131$ Fahrenheit (-30°C to $+55^{\circ}\text{C}$) with constant temperatures of ± 1 K. Key features include humidity regulation, temperature mapping, insulated switch cabinets, and rapid cooling. 1., and meet the requirements of relevant storage product standards for better. If the temperature is too high or too low, it will not only affect the capacity of the battery, but more importantly, it will also damage the plates the structure of the environmentally friendly knitted fabric provided by the present invention; figure 2 Flow chart of the yarn wrapping machine for. Constant temperature and humidity cabinets are widely used in products that need to be stored under specific temperature and humidity conditions, such as: semiconductors, chips, optical instruments, precision molds, precision instruments, films, medicines, automotive sealing supplies, optical.

Energy storage box constant temperature

PCM Constemp logistic box , New Material Technology

Based on PCM energy storage technology with world-class composite insulation materials. THERO developed a long-lasting, constant-temperature cold-chain case with customizable temperatures.
