

## PIENAAR ENERGY (PTY) LTD

# Energy storage lithium battery certification test

## Overview

---

UL 9540 is the primary certification for energy storage systems. We can also conduct an evaluation in the field or at a manufacturing location if required. We also offer performance and reliability testing, including capacity claims, charge and discharge cycling, overcharge. Benefits of energy storage system testing and certification: We have extensive testing and certification experience. Our testing laboratories are A2LA and ISO/IEC 17025-accredited, and our global expertise enables us to support clients worldwide. Safety and Risk Mitigation Battery systems, if not designed properly, can pose fire hazards or thermal runaway risks. So, what certifications are necessary for energy storage batteries, and what do they mean?

This article provides a clear and structured overview of key certifications. A lithium battery cabinet in a plant or hotel runs real loads, triggers fire code reviews, and appears in lender risk models. For decision makers, three questions matter most: is it safe for people on site, will it survive real operating conditions, and will banks, insurers, and regulators accept.
