

## PIENAAR ENERGY (PTY) LTD

# Energy storage system power cost

## Overview

---

Utility-scale systems now cost \$400-600/kWh, making them viable alternatives to traditional peaking power plants, while residential systems at \$800-1,200/kWh enable homeowners to achieve meaningful electricity bill savings through demand charge reduction and time-of-use. Utility-scale systems now cost \$400-600/kWh, making them viable alternatives to traditional peaking power plants, while residential systems at \$800-1,200/kWh enable homeowners to achieve meaningful electricity bill savings through demand charge reduction and time-of-use. This report is available at no cost from NREL at [www.nrel.gov](http://www.nrel.gov). Cole, Wesley, Vignesh Ramasamy, and Merve Turan. Cost Projections for Utility-Scale Battery Storage: 2025 Update. DOE's Energy Storage Grand Challenge supports detailed cost and performance analysis for a variety of energy storage technologies to accelerate their development and deployment. The U. President-elect Trump has proposed a 60% tariff on all imports from China. If executed, turnkey grid-scale storage costs for Chinese systems could be US\$ 1,084 - 1,204 / kW. With 45X and the. This battery storage update includes summary data and visualizations on the capacity of large-scale battery storage systems by region and ownership type, battery storage co-located systems, applications served by battery storage, battery storage installation costs, and small-scale battery storage. This landscape is shaped by technologies such as lithium-ion batteries and large-scale energy storage solutions, along with projections for battery pricing and pack prices.
