

## PIENAAR ENERGY (PTY) LTD

# Energy storage system procurement scale requirements

## Overview

---

States can establish energy storage procurement targets to jump-start the development of energy storage systems. The checklist items contained within are intended for use in procurement of commercial scale lithium-ion. chapter offers procurement information for projects that include an energy storage component. The material provides guidance for different ownership models including lease, Power Purchase Agreement (PPA), or Owner Build and Operated (OBO). Store excess PV generation for use later during non-solar hours. Other use cases include. In 2013, the CPUC issued Decision (D. The CPUC's energy storage procurement policy was formulated with three primary goals: Greenhouse gas (GHG) reductions in support of the State's targets.

## Energy storage system procurement scale requirements

- LiFePO<sub>4</sub> Battery,safety
- Wide temperature: -20~55°C
- Modular design, easy to expand
- The heating function is optional
- Intelligent BMS
- Cycle Life:> 6000
- Warranty:10 years

### Energy Storage Targets , State Climate Policy Dashboard

States can establish energy storage procurement targets to jump-start the development of energy storage systems. These targets set a required amount of energy storage, typically expressed ...
