

PIENAAR ENERGY (PTY) LTD

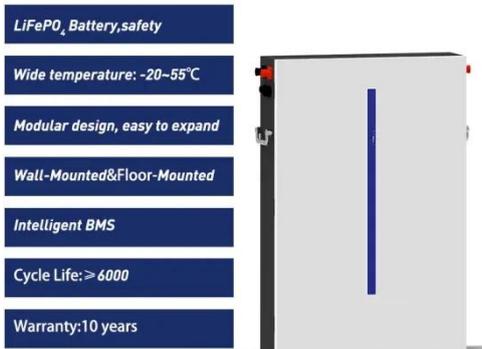

**English translation Wind is used
to generate electricity**

Overview

Wind power or wind energy is a form of renewable energy that harnesses the power of the wind to generate electricity. It involves using wind turbines to convert the turning motion of blades, pushed by moving air (kinetic energy) into electrical energy (electricity). Associate Professor of Engineering Systems and Atmospheric Chemistry, Engineering Systems Division and Department of Earth, Atmospheric and Planetary Sciences, Massachusetts Institute of Technology. This article deals only with wind power for electricity generation.

English translation Wind is used to generate electricity

How is electricity generated using wind?

It's a fairly simple process: When the wind blows, the turbine's blades spin which captures energy. This energy is then sent through a gearbox to a generator, which converts it into electricity for the grid, ...
