

PIENAAR ENERGY (PTY) LTD

Expandable Transaction Conditions for IP66 Battery Cabinets Used in Subways

Overview

This article provides a detailed introduction to the testing scope, standards, and methods for IP66-rated enclosures and cabinets. The "6" in the IP66 rating signifies the highest level of dust protection. The classification uses a two-digit format: the first digit (0-6) specifies solid particle protection levels, while the second digit (0-9) indicates liquid ingress. When selecting electrical enclosures, one of the most critical specifications to consider is the IP (Ingress Protection) rating. Plus how easy it is for individuals to access the potentially hazardous parts within the enclosure.
