

**PIENAAR ENERGY (PTY) LTD**

# **Father of Solar Photovoltaic Power Generation**

## Overview

---

In 1839, Alexandre Edmond Becquerel discovered the photovoltaic effect, a pivotal moment that laid the foundation for modern solar energy. This effect refers to the generation of an electric current when certain materials are exposed to light. Solar cells have gone on to be used in many applications. Early experiments by Greeks, Romans, and Egyptians showcased the. As is widely accepted by the scientific community, the existing and emerging technologies that use sunlight to generate electricity are considered the cleanest renewable energy source available. Today's rooftop installations trace their lineage through brilliant inventors, accidental discoveries, and Cold War space races—transforming. David Kuchta, Ph. An environmental activist since the 1970s, he is also a historian, author, gardener, and educator. Marketing in 1903 for solar-driven steam engines; Pasadena. Solar power was first discovered by French physicist Edmond Becquerel in 1839 at the young age of 19. His process involved placing.
