Fiji Solar Water Pump Specifications

Overview

The off grid solar pump system uses 600W permanent magnet solar borehole water pump. This series with max head of 80 meters and max daily water flow of 40,000 lts. There are. The Department of Energy (DOE) has been assisting villages in the installation of Solar Water Pumps to cater for village water supply needs. For this type of project, the Mineral Resources Department first has to undertake drilling of boreholes for water quantity and quality tests for requested. The development of this guideline was funded through the Sustainable Energy Industry Development Project (SEIDP). You can contact us by email at sales@machinesequipments.com for reliable Solar Water Pump supplier, we are well-known for our. The solar water pump manufacture will provide information on the solar water pumping system performance for various heads and solar irradiation.
