

**PIENAAR ENERGY (PTY) LTD**

# **Finland s new energy and energy storage**

## Overview

---

Renewable thermal storage is gaining prominence again in Finland with the development of a new system based on sand that promises to drastically reduce the use of fossil fuels. Finland holds an enviable position in terms of the production of cleaner energy, with a diverse mix of. The system converts renewable electricity into high-temperature sand storage to deliver industrial heat on demand. TheStorage The Finnish cleantech startup TheStorage officially commissioned its first industrial-scale thermal energy system at a local brewery in January 2026. Lahti Energia and Polar Night Energy announced the construction of an industrial unit that will operate within the Vääksy. review of the current status of energy storage in Finland and future development prospecting details, and we will remove access to the work immediately and investigate your cyclic Battery energy storage Thermal energy storage Pumped hydropower showing rapidly in Finland.

## Finland s new energy and energy storage

---

### Finland activates world's largest sand battery to store renewable heat

Finland has activated the world's largest sand battery in Pornainen, storing excess renewable energy as heat to power an entire town's heating needs. The system cuts heating ...
