

PIENAAR ENERGY (PTY) LTD

Fishpond photovoltaic panel installation team

Overview

● Our sales team will provide you with basic product introduction and training. The general form is photovoltaic panels on the top of the fish pond. The electricity generated by the photovoltaic panels can supply power to the entire fish pond, or it can be sent to the substation. It involves installing a photovoltaic panel array above the water surface of fish ponds, while allowing fish and shrimp farming in the water below. Communicate with our team to find the most suitable new energy solution for you. A unit of 8-watt lamp for lighting supplied by 1 stems in fish farms: Design and Installation of Solar Panels.

Fishpond photovoltaic panel installation team

Fishery-solar Hybrid Power Station System

Our technical team will design a complete solution according to your project requirements. We provide installation guides and online services for the solar mounting system.
