

## PIENAAR ENERGY (PTY) LTD

# French energy storage project construction requirements

## Overview

---

Article 85 of the Climate and Resilience Act dated 22 August 2021 created Article L. 352-1-1 of the French Energy Code, which provides for the use of calls for tenders to develop electricity storage capacities. Decree n° 2022-788 of 6 May 2022 specifies how the tender. According to the European Energy Storage Association, 200 GW of storage will be required across the EU by 2030, implying annual deployment of at least 14 GW. In France, the multiannual energy program #3 (PPE 3), which is expected to be published soon, foresees a significant increase in battery. Cernay-lès-Reims, France - TagEnergy is set to construct France's largest battery energy storage system (BESS) in Cernay-lès-Reims. The 240MW/480MWh project will be five times larger than the country's current biggest operational battery. Why is tagenergy launching a solar storage system in France?

. France's battery operational fleet is growing and starting to shift to longer durations France's battery fleet is continuing to scale and is on track to reach 1.
