

**PIENAAR ENERGY (PTY) LTD**

# **French new energy storage vehicle**

## Overview

---

PARIS, SEPT- Stellantis, in partnership with Saft (a TotalEnergies subsidiary), has unveiled a groundbreaking prototype vehicle featuring IBIS technology— a French-based collaborative research project aimed at developing a more efficient, sustainable, and cost-effective energy storage and electric conversion solution. The €250 million (C\$371M/US\$264M) 240MW/480MWh BESS project is a milestone for France, boasting a capacity. TAGENERGY, a global leader in low-carbon energy solutions, launches construction of France's largest battery energy storage platform (France, Marne). This landmark project marks the start of an ambitious expansion plan for 2025, with accelerated solar and storage development activities. We develop and operate modular energy storage systems using long-life Lithium Iron Phosphate (LiFePO<sub>4</sub>) batteries, supported by a proprietary. The Cheviré project is located on the former site of a coal, gas and oil-fired plant, transforming it into a renewable energy center. The Cheviré project, which will use.
