# **Galvanized grounding wire for photovoltaic panels**

## Overview

---

Article 690 of the NEC mandates that #8 AWG or #6 AWG are the smallest wires that can be used with grid tied solar panels and inverter systems, and for solar panel output circuits, #10 or #12 AWG are allowed. A ground rod is also recommended if the installation area is prone to. When it comes to grounding requirements for solar panels, you must meet the stringent guidelines that are central to your project. Not only are the. I'm run a ground wire to the panels and connect to my house's grounding system. Can I use 12 AWG wire for my grounding wire?

(I ran out of 12 AWG wire) It's supposed to be 10 awg per 250. Check your local electrical codes. Since I don't install PV systems, I don't keep up with all the NEC requirements. A ground rod is also. Did you know that 65% of solar fire incidents reported in the 2024 Solar Safety Report were linked to improper grounding?

Photovoltaic panel grounding wires aren't just regulatory checkboxes—they're your first line of defense against electrical disasters.
