

PIENAAR ENERGY (PTY) LTD

High-efficiency IP55 outdoor photovoltaic cabinet used in train stations

Overview

Combines high-voltage lithium battery packs, BMS, fire protection, power distribution, and cooling into a single, modular outdoor cabinet. Uses LiFePO₄ batteries with high thermal stability, extensive cycle life (up to 6000 cycles), and stable performance under load. AZE's lithium battery energy storage system (BESS) is a complete system design with features like high energy density, battery management, multi-level safety protection, an outdoor cabinet with a modular design. It is built specifically for outdoor installation and integrates advanced LiFePO₄ battery. Highjoule's Outdoor Photovoltaic Energy Cabinet and Base Station Energy Storage systems deliver reliable, weather-resistant solar power for telecom, remote sites, and microgrids. Sustainable, high-efficiency energy storage solutions. The cabinet provides an enclosure that is weather-tight for servers, batteries, inverters and telecommunication equipment with dual AC and DC power inputs/outputs. IP55,IP65,IP66 Outdoor integrated cabinets are primarily used for wireless communication base stations, including next-generation 5G systems, communication networks, network integrated services, access/transmission switching stations, emergency communications/transmissions, etc.
