

PIENAAR ENERGY (PTY) LTD

How about new energy storage

Overview

Latest news on energy storage projects, BESS, capacity expansion, and regulatory updates across Europe, US & Canada, Latin America, and Asia Pacific. Discover how energy storage solutions support renewable energy integration and grid transition to clean power. Energy storage is expected to play a significant role in enabling the global data centre build-out, although the commercial and financing models developers will use are evolving, Energy-Storage. By the end of December 2025, China's cumulative installed capacity of new energy. From iron-air batteries to molten salt storage, a new wave of energy storage innovation is unlocking long-duration, low-cost resilience for tomorrow's grid. As we stand in 2025, the global energy landscape is rapidly transforming, with renewable sources like solar and wind power accounting for an increasingly larger share of electricity. UK energy storage company Zenobe has decided to enter the German market and is looking to acquire battery energy storage systems (BESS) of no less than 1 GW/4 GWh by 2030.
