# How big a solar panel can power a storage container

## Overview

---

Typically, a standard 40ft solar container can accommodate 30 to 45 panels, depending on: Panel wattage and dimensions. Mounting structure (fold-out, sliding, or roof-mounted). Bulk shipping of solar panels is a very popular choice to use a 40-foot container. If you are in the solar business or ordering in bulk, this information is. Upgrading your shipping container home or your container office with solar power can help to reduce electricity costs or even make the transition to off-grid living possible. These systems can power heating, lights, computers, etc. But just how many panels can fit into such a container?

This question is not merely academic; it has real-world implications for manufacturers, suppliers, and installers alike.
