# How big is a 5MW energy storage container

## Overview

---

These systems are critical for modern power management, but their physical footprint and technical specs vary. 4 meters (8 feet) and a height of 2.6. AceOn offer one of the worlds most energy dense battery energy storage system (BESS). 8% increase in energy density compared to previous 20. Liquid-cooled battery storage system based on prismatic LFP ESS cells 314 Ah with the highest cyclic lifetime Improved safety characteristics and specially optimised for the highest requirements on safety, reliability and performance. Ideal for industrial, utility, or microgrid applications in the EU.
