

**PIENAAR ENERGY (PTY) LTD**

# **How big is a battery for solar power generation**

## Overview

---

To size your solar battery, assess your energy needs. For grid-connected systems, use 1-3 lithium-ion batteries with at least 10 kWh capacity. Always consider daily energy production, peak usage, battery capacity, and depth of discharge to ensure proper. When building a solar power system, batteries are key, whether you're preparing for off-grid living, seasonal blackout protection, or daily load balancing. But how do you know which battery size best meets your energy needs?

This guide walks through essential terminology, step-by-step sizing. Battery sizing is goal-driven: Emergency backup requires 10-20 kWh, bill optimization needs 20-40 kWh, while energy independence demands 50+ kWh. It allows you to store excess energy generated during the day and use it when the sun isn't shining, or during peak tariff times.
