How long can a 20kW uninterruptible power supply last

Overview

The runtime of a 20kVA UPS (Uninterruptible Power Supply) depends on the load it supports. Typically, at a 50% load, it can last between 30 to 60 minutes, while at a 100% load, the runtime may drop to around 10 to 15 minutes. These small, affordable power units act as a power source for your sensitive electronics in case of a power outage. Battery capacity and health also significantly influence these durations. UPS systems are commonly used in: . Because an uninterruptible power supply (UPS) can represent a significant capital investment, it is important to have a general idea of how many years that investment will last.
