How long does it take for solar glass to pay back

Overview

Residential solar payback periods commonly fall in a broad band centered near about 10 years, with published estimates across the supplied analyses ranging from roughly 5 to 16 years depending on location, incentives, system cost and financing. However, in some states, the payback period can be as short as five years or as long as 15. In this guide, we'll help you calculate your solar panel payback. That break-even point—your solar payback period—tells you exactly when your system stops costing you money and starts making you money. 1 On average, residential solar installations in the U. pay for themselves within 7 to 10 years, although this varies. Geographic location, government incentives and your household's electricity usage impact how quickly your solar investment will break even.
