# **How many batteries are needed for photovoltaic panels**

## Overview

---

How many batteries do I need for solar?

Grid-connected solar systems typically need 1-3 lithium-ion batteries with 10 kWh of usable capacity or more to provide cost savings from load shifting, backup power for essential systems, or whole-home backup power. Getting the right number of batteries is crucial for maximizing your energy efficiency and ensuring you have enough power during those cloudy days or at night. This article will guide you through the factors that influence battery needs, helping you make informed decisions for a reliable solar. The answer depends on a few things, including your energy goals, the size and type of batteries you're using, and the size of the load you want to power.
