

**PIENAAR ENERGY (PTY) LTD**

# **How much area does solar energy storage start to invest in**

## Overview

---

The global solar energy storage market is set to grow from USD 14.5 billion in 2024, at a CAGR of 17%. Government incentives for solar-plus-storage installations and net metering policies enhancing storage demand along with rising environmental concerns. We expect 63 gigawatts (GW) of new utility-scale electric-generating capacity to be added to the U.S. power grid in 2025 in our latest Preliminary Monthly Electric Generator Inventory report. This amount represents an almost 30% increase from 2024 when 48.6 GW of capacity was installed, the largest. — The Solar Energy Industries Association (SEIA) is unveiling a vision for the future of energy storage in the United States, setting an ambitious target to deploy 10 million distributed storage installations and reach 700 gigawatt-hours (GWh) of total installed storage capacity by 2030. Read more about this report - [REQUEST FREE SAMPLE COPY IN PDF](#) The solar.

## How much area does solar energy storage start to invest in

---

### Solar, battery storage to lead new U.S. generating capacity additions

In 2025, capacity growth from battery storage could set a record as we expect 18.2 GW of utility-scale battery storage to be added to the grid. U.S. battery storage already achieved record growth in 2024 ...
