How much does a 100kW solar energy storage cabinet cost in an australian port

Overview

A 100kW solar system in Australia costs $86,200 – $95,000, produces around 380 – 440 kWh per day, and typically suits commercial and industrial sites aiming to save $28,000 – $32,000 per year, depending on usage and feed-in tariffs. 100kW solar systems are among the most popular commercial solar system sizes in Australia, as this size is the cutoff point for up-front incentives through the federal government. The 100kW commercial solar system generates an average of 400kWh. In this 2025 expert pricing guide, we'll break down the solar battery storage price in Australia, including costs per kWh, installation pricing, top brands, rebate savings, and real-world examples — all written by an expert solar energy writer for Australian Design Solar. Prices swing between $25,000 and $70,000 —like comparing a budget sedan to a luxury EV. But why the wild range?

 Let's break this down. All figures below already include the Cheaper Home Batteries Program rebate, assuming the installer assigns.
