# **How much is the price of energy storage batteries for Eastern Europe**

## Overview

---

In the European market, lithium-ion batteries currently range from €200 to €300 per kilowatt-hour (kWh), with prices continuing to decrease as manufacturing scales up and technology improves. Summary: This article explores the latest pricing trends for smart energy storage batteries in Eastern Europe, analyzes key cost drivers across industries, and provides actionable insights for businesses navigating this dynamic market. Discover how regional policies, technological advancements, and LFP spot price comes from the ICC Battery price database, where spot price is based on reported quotes from companies, battery cell prices could be even lower if batteries are purchased in high volume. 1 GWh of new capacity installed, the European Union achieved its 12th consecutive record-breaking year of growth, confirming battery storage as the fastest-scaling clean energy technology in the region.
