

PIENAAR ENERGY (PTY) LTD

How much solar power does Egypt generate

Overview

While fossil fuels still dominate, generating 88% of Egypt's electricity in 2023, hydropower contributes 7%, and wind and solar account for 5%, a rise from 1% in 2015 but still below the global average of 13% and Africa's 6%. [1] Egypt remains Africa's largest producer of gas-fired electricity. Egypt has revised its targets upward, now aiming to generate 42 percent of electricity from renewable sources by 2030 and over 60 percent by 2040, leveraging wind, hydropower, photovoltaic solar, and emerging technologies such as green hydrogen. To support this shift, the European Commission. The most common solar DNI intensity is over 7.9 kWh/m² per day, distributed on the South Sinai Peninsula. 8%) is less than a third of the global average (15%). Egypt relied on fossil fuels for 89% of its electricity in 2024. 3 GW of utility-scale wind and solar power projects, raising its national combined capacity to 6.
