# How to install solar panels into containers

20 ft container

40 ft container

## Overview

---

This article will explore the benefits, customization options, installation techniques, and real-life applications of solar panels on shipping containers. In search of a way to semi-temporarily mount some solar panels to a shipping container without drilling any holes in it or resorting to complex racks, I came up with this system using magnets! Not the right solution for every case, of course, but I hope you find it useful. Can you put solar panels on a shipping container roof?

Absolutely!. One of the most innovative uses of solar panels is their installation on shipping containers, offering a portable and versatile platform for generating solar power. This gives you many good things. More people are using this for off-grid and moving energy needs. It is growing by 15% each year.
