# **How to know if photovoltaic panels are broken**

## Overview

---

There are a few ways to detect damage to your solar panels. A visual inspection may reveal broken or cracked glass, a problem with the frame or mounting or damaged or disconnected wiring issues. It's important to be able to identify signs of a bad solar panel so that you can have it repaired or replaced as soon as possible. Or, you might. Solar panels are a great way to convert the energy of the sun into electricity. Among these, decreased power output warrants rigorous monitoring of energy production and comparison with expected levels.
