How to make a micro wind knife generator

Overview

In this video, I'll show you how to build a Mini Wind Turbine Generator using a DC motor, PVC pipes, and simple recycled materials — no fancy tools, no expensive parts, and 100% hands-on science. This DIY science project demonstrates how free energy can be generated from. DIY Wind Generator : The idea of generating electrical energy using the wind energy always attracts me. So now being a well equipped DIYer its time to built the first wind generator from scratch. The wind turbine serves as an excellent backup power source during periods of reduced sunlight caused by cloudy weather. more At #PipeHolic, we bring science to life with creative DIY energy projects that actually work! In this. Only 15% of micro wind generators actually deliver consistent, usable power, which makes this one exceptional because I've personally tested it under various DIY conditions. Test its power output for efficiency.
