How to raise pigeons under the photovoltaic panels on the roof

Overview

This expert guide breaks down the root cause of rooftop pigeon problems, compares skirts vs. mesh in plain language, outlines humane deterrents that don't backfire, and maps a maintenance program calibrated to seasons, climate, and roof type. When pigeons make a home under your solar panels, they can cause a variety of issues, some of which may affect the efficiency and longevity of your solar system. Here are the most common problems: One of the biggest issues with pigeons nesting under solar panels is the buildup of droppings and. Solar panels accidentally create the perfect pigeon paradise - sheltered, warm, and elevated. Their droppings are acidic, which can corrode panel surfaces and roofing materials, while nesting debris can block airflow, reducing panel efficiency. Not to mention, the noise and health hazards.
