## An Introduction to Energy Storage Systems

Potential Energy Storage  
Electrochemical Energy Storage  
Mechanical Energy Storage  
Electrostatic Energy Storage  
Power Performance vs. Energy Performance  
This kind of storage system is based on chemical reactions associated with the elements used to manufacture the battery. The common battery is composed of cells, with two electrodes (anode and cathode) and an electrolyte. Chemical reactions within the battery provide the electromotive force required for the flow of electric current. See more on eepower Sandia
