

PIENAAR ENERGY (PTY) LTD

Huawei Site Energy Operation and Maintenance Intelligence

Overview

Huawei offers an integrated software and hardware platform that standardizes data access and establishes a flexible, reliable, and remote intra-station network. This enables seamless access to various sensing terminals and ensures the smooth backhaul of massive HD videos. Substations are crucial energy transmission nodes in power grids, responsible for power production, operation, and control. To ensure safe, reliable, and efficient operation, preventive maintenance inspections are conducted on substation devices to monitor their running status, detect problems, and. Carbon neutrality has long been a priority for telcos, and despite the surge in AI innovation sweeping through the mobile industry, sustainability remains firmly on the agenda. Green, AI-based emission. [Dubai, UAE,] During the 9th Global ICT Energy Efficiency Summit in Dubai, Huawei showcased its next-generation digital and intelligent site power facility solution Single SitePower, which is set to drive the intelligent transformation of ICT energy infrastructure.
