

PIENAAR ENERGY (PTY) LTD

Huawei communication base station battery energy storage system rru

Overview

The DBS5900 adopts a modular structure, with the baseband unit BBU and remote radio unit RRU deployed separately. Energy Storage System Products List covers all Smart String ESS products, including LUNA2000, STS-6000K, JUPITER-9000K, Management System and other accessories product series. 5900 series base stations have a modular design. The BBU uses common public radio interfaces (CPRIs) and electrical or optical cables to communicate with the RRUs. 1)The cabinet is made of high quality galvanized steel; 2)Surface treatment: degreasing, derusting, anti-rust phosphate (or galvanizing). Taking the lead-acid battery pack of a 48V communication base station as an example, it is commonly configured with multiple 12V lead-acid batteries in series. rru huawei are designed to facilitate wireless communication by. When natural disasters cut off power grids, when extreme weather threatens power supply safety, our communication backup power system with intelligent charge/discharge management and military-grade protection becomes the "second lifeline" for base station equipment. 45V output meets RRU equipment.
