

PIENAAR ENERGY (PTY) LTD

Huawei energy storage battery development

Overview

Huawei is developing a solid-state EV battery it says can deliver 1,800 miles of range after a five-minute charge. The project appears in a 2023 patent filing, suggesting it has been in development for at least two years. The development signals a significant push by the tech giant to stake a claim in. Huawei's patent application reveals that its battery uses a method of doping sulfide electrolytes with nitrogen to reduce side reactions at the lithium interface.
