# **Huawei solar Mandatory Energy Storage Policy**

## Overview

---

Well, the Chinese government just dropped a bombshell in February 2025 - they've officially abolished compulsory energy storage configurations for new renewable projects [3] [9]. In a major policy shift toward electricity market liberalization, China has introduced contract-for-difference (CfD) auctions for renewable plants and removed the energy storage mandate, which has driven up to 75% of national demand to date. S&P Global expects the move to reverberate through the. Huawei's Smart String Grid-Forming ESS ensures robust protection through five layers of integrated safety design, from individual cells, battery packs, racks, systems, and the grid. Will Huawei fusion solar power Red Sea city's off-grid energy needs?

. On February 9, China's National Development and Reform Commission (NDRC) and National Energy Agency (NEA) jointly published the Notice on Deepening Market-Based Reform of Renewable Energy On-Grid Tariffs to Promote High-Quality Renewable Energy Development. As the tides recede, only companies that can iterate.
