

PIENAAR ENERGY (PTY) LTD

Hungarian base station communication maintenance

Overview

This article discusses how to improve the power supply safety of the power supply system of communication base stations, reduce the failure rate of the power supply system of communication base stations, and improve the network operation efficiency, for reference. This article discusses how to improve the power supply safety of the power supply system of communication base stations, reduce the failure rate of the power supply system of communication base stations, and improve the network operation efficiency, for reference. Embraer has signed a service agreement to provide maintenance, logistical, and technical support for the Hungarian Air Force's C-390 Millennium transport fleet. Under the contract, Embraer will use its European support network to sustain Hungary's two C-390 aircraft. The country is the second NATO. That is why it is necessary to establish communications systems that are capable of providing services that can in spite of the above mentioned negative factors. These systems have to meet the following requirements: mobility, flexibility, ability to react, safety and standardization. From the proportion of each professional maintenance workload in the total maintenance workload, the maintenance workload caused by the failure of professional power supply equipment accounts for more than 60%. In the frame of the major project „Development of the Unified Digital Radio Telecommunications System” Pro-M Zrt. With the twenty three newly implemented base stations put into operation recently the. In addition to the overhaul of the Aircraft Arresting System, a training to the Airbase maintenance team aimed at assuring the required skills and ability to maintain the systems was provided.
