

PIENAAR ENERGY (PTY) LTD

Hungary Mobile Energy Storage Container Two-Way Charging

Overview

The scheme was approved under the State aid Temporary Crisis and Transition Framework, adopted by the Commission on 9 March 2023 to support measures in sectors which are key to accelerate the green transition and reduce fuel dependencies in the context of Russia's war against Ukraine. In early 2025, Hungary's solar capacity reached 7'550MW, with an installed capacity that has multiplied by ten since 2018 and is set to grow to 12'000MW by 2030, as outlined in the Hungarian National Climate and Energy Action Plan. The installed solar capacity has thus reached the maximum system. Hungary has just switched on its largest battery energy storage system (BESS) to date, stepping up its role in Central Europe's growing grid-scale energy transition. The plant, located at the thermal power plant Dunamenti thermal power plant, has an installed capacity of 40 MW and a total storage. The European Commission has approved a €1.

Hungary Mobile Energy Storage Container Two-Way Charging

MET flips the switch on Hungary's biggest battery project

Situated at the Dunamenti Power Station in Százhalombatta, the new battery energy storage system builds on MET Group's earlier 4 MW / 8 MWh demonstrator plant installed in 2022 ...
