

**PIENAAR ENERGY (PTY) LTD**

# **Integration of DC Systems with Modular Battery Cabinets in Remote Areas**

## Overview

---

Outdoor battery cabinets are an easy way to add a new DC system to older substations where room in the control house is limited. This allows for a backup power source for control equipment and enables remote switching and recovery operations if AC control power is not. The table below shows how reliable Telecom Rectifier System Battery setups directly improve uptime and minimize outages. Backup power configurations increase reliability by 25%. 33% of downtime comes from power outages. ESTEL stands as a trusted name in outdoor telecom solutions.

**UPS-Dedicated Modular Cabinets: The “Emergency Shield” for Data Centers and Industry Servers in data.**

Multi-dimensional use, stronger compatibility, meeting multi-dimensional production and life applications High integration, modular design, and single/multi-cabinet expansion Zero capacity loss, 10 times faster multi-cabinet response, and innovative group control technology Meet various industrial. Scalable to 210kWh/344kWh/368kWh power configurations. 3□ Extendable-modular, adding more capacities as needed, Nx210KWh/344 KWh/368 KWh. 4□ Safest LiFePO4 technology, sustained power supply. 5□ Long lifespan, up to 6000 cycles. 6□. The energy storage DC cabin adopts an integrated design, integrating the battery cluster (including battery Packages and high-voltage boxes ), BMS, junction cabinets, fire protection systems, liquid cooling systems, lighting, video surveillance and other facilities are installed in the DC cabin. Placing a DC system with an indoor cabinet allows installation in areas other than a dedicated electrical or battery rooms allowing more flexibility on the installation location while still meeting code requirements.

## Integration of DC Systems with Modular Battery Cabinets in Remote

### Indoor and Outdoor Battery Cabinet Systems

Outdoor battery cabinets are an easy way to add a new DC system to older substations where room in the control house is limited. This allows for a back-up power source for control equipment and ...
