

**PIENAAR ENERGY (PTY) LTD**

# **Into hybrid energy storage projects**

## Overview

---

Hybrid projects are integrated renewable energy installations that combine solar farms and wind farms with energy storage systems. This comprehensive review examines recent advancements in grid-connected HESS, focusing on their. the electric grid and are dispatched as a single generation entity. According to the Australian Energy Market Operator (AEMO) Integrated System Plan 2024, the National Electricity Market (NEM) will require approximately 36 GW / 522 GWh of storage. At WonVolt, we've been building these systems for industrial and commercial customers since 2016. Everything under one roof, from the N-type TOPCon panels to the containerized battery packs.

---

### Hybrid Energy Storage Systems for Renewable Energy

...

Integration of Renewable Energy Sources (RES) into the power grid is an important aspect, but it introduces several challenges due to its inherent intermittent
