

**PIENAAR ENERGY (PTY) LTD**

# Is solar power generation in the south cost-effective

## Overview

---

Regionally, the percent of electricity generation from solar doubled from 2010 to 2015, according to the Energy Information Administration (EIA). Underinvestment in solar comes with an enormous opportunity cost. Of all the solar power sourced to a utility or state relative to the amount of retail customers. As a regional organization, SACE tracks and compiles electric utility integrated resource plans (IRPs) that investor-owned utilities file with state-level regulators. Harnessing the sun's energy directly leads to reduced air pollutants, decreased water usage, and less dependence on traditional energy sources.
