# Is there a waiting list for the delivery of photovoltaic brackets

## Overview

---

The Interconnection Queue is the official waiting list for connecting solar projects to the electrical grid. When a developer submits an interconnection request, the project enters this queue and. In the third quarter of 2025, solar projects representing about 20% of planned capacity reported a delay, a decrease from 25% in the same period in 2024, based on data compiled from multiple Preliminary Monthly Electric Generator Inventory reports. Solar power is the fastest-growing source of new. Solar permit and interconnection approval times in the United States range from 25 to 64 days, depending on your state.
