

PIENAAR ENERGY (PTY) LTD

Italian vanadium energy storage project

Overview

Gamesa Electric will test and validate a Vanadium redox flow battery of Invinity as part of the first call for innovative energy storage R&D projects under the Recovery, Transformation and Resilience plan. The validation will be carried out at the hybrid plant in La Plana during 2025. The hybrid. MILAN, Italy - Sonnedix, a global renewable energy company with over 4GW of operating capacity, has expanded its Italian portfolio with the acquisition of five new projects in Sicily and Lazio, adding a combined capacity of 226MW. Called Magaldi Green Thermal Energy Storage (MGTES), the storage tech was developed by ultra-high temperature material handling company Magaldi. Enter vanadium energy storage projects - the unsung heroes making 24/7 clean energy possible. Let's unpack why utilities and tech giants are betting big on this "liquid electricity" solution. Unlike your smartphone battery that conks out after a few years, vanadium flow batteries (VFBs) are like. Partners Enel X and Magaldi Group have begun construction in Salerno, Italy, on a 13MWh thermal energy storage (TES) plant based on a patented technology.
