

PIENAAR ENERGY (PTY) LTD

Jerusalem energy storage for microgrids

Overview

Nestled in Jerusalem's industrial zone, the shared energy storage power station serves as a centralized battery hub for multiple users - from solar farms to manufacturing plants. At the Jerusalem Tech Park, AGEERA deployed an 8.3 MWh / REN-based behind-the-meter battery system, designed to enhance the site's energy resilience and optimize renewable utilization across its high-tech and research facilities. Think of it as a "community charging bank" where businesses store excess solar energy during peak hours and retrieve it.

Thermal Energy Storage: Several Israeli companies have pioneered high-efficiency thermal storage systems that convert excess electricity into heat, which can be stored for hours or days before being converted back to electricity when needed.

Hydrogen Solutions: Israeli startups are advancing green. With growing demand for renewable integration and grid stability, energy storage projects in Jerusalem have become critical. These initiatives not only support solar and wind power adoption but also ensure reliable electricity for residential, commercial, and religious sites.

Now, why. Chakratec, which provides flywheel energy storage technology to create more sustainable EV charging solutions - from modular fast-charging stations to fully managed charging networks. How many EV charging stations are there in.
