

PIENAAR ENERGY (PTY) LTD

Kosovo electric vehicles evs

Overview

By analyzing emissions data, economic and health costs of conventional vehicles, and the environmental benefits of EVs, this paper argues that transitioning to electric mobility is crucial for Kosovo's sustainable development. Electric Vehicles (EVs) represent a transformative shift in the automotive industry and offer a vital opportunity for climate and energy policy to reduce emissions and increase energy efficiency. This position paper explores the potential of Vehicle-to-Grid (V2G) technology, the current state of EV. The import of electric vehicles in Kosovo is continuously increasing, while citizens are demanding the removal of customs duties and subsidies from the state for the purchase of these ecological vehicles. This marked a turning point, showing that electric transport is no longer a distant idea but a.
