Kou District Solar Power Generation Customization

Kou District Solar Power Generation Customization

District Solar Power Generation Customization

Do efficiency enhancements improve solar power integration in urban contexts? Efficiency enhancements play a pivotal role in the viability of solar power integration. The paper analyzes ...

Jiang District Solar Power Generation Customization

To support future solar energy deployment in China, long-term changes in solar energy resources over China were investigated based on high-resolution dynamical downscaling simulations under three ...

Optimization of a solar-based integrated energy system considering

This study uses both system optimization and power-flow calculations to analyze the energy interaction between the different sides (generation/network/demand) of a district solar-based ...

Yu Kou's research works , Xi'an Jiaotong University, Xi'an (XJTU) and

The instability and volatility of renewable energy sources (e.g., wind, solar) may impact the power system, generating power surpluses and power shortages at other times.

Renewable generation monitoring platform and its applications

In this study, a renewable generation data collection platform is presented to address the increasing need for solar generation monitoring. The data platform consists of data collection, event ...

Reliability modeling and configuration optimization of a photovoltaic

Proposed a reliability model for a photovoltaic based power generation system. Suggested an efficient algorithm for the reliability model. Both internal failures and external impacts are ...
